<https://www.youtube.com/watch?v=pGQY2Ct3qJw>

Goal: Grow marketplace

Condition: Without breaking customer experience

POPULATION DENSITY, 2000

Some questions:

Find distribution of sellers and customers?

Is there a lopsided distribution of sellers and customers?

Products:

What is the general product profile?

Which is the top product sold in terms of quantity/cost?

Find this per city or region. Is there room for improvement?

Order:

Is there any pattern in orders based on region/time? or Is there seasonality/cycle in the ordering pattern?

For orders of the same items, is the experience same in all regions?

What is the customer experience in delivery? Is it good, bad, ugly

What is the average time taken to deliver products/across products?

Sourish:-

Which seller have high business contribution but poor customer experience?

Which products and sellers make marketplace growth?

EDA for each dataset:
